Ucok Sayuti

Web Developer | UI Designer

Surakarta, Central Java, Indonesia

Summary

As an Informatics Engineering student, I have developed a strong foundation in web development technologies. My journey includes participating in the Kampus Merdeka Studi Independen program. I studied to be a FullStack Web Developer at LearningX (Batch 5) and then specialized as a Front-End and Back-End Web Developer at Dicoding (Batch 6).

During college, I also developed various projects and assignments, including websites, games, and mobile applications. I enjoy participating in competitions and have won several competitions such as programming and UI/UX design, which reflects my commitment to providing high-quality and user-centric solutions.

I have worked and created projects using several programming languages such as JavaScript, HTML, CSS, PHP and Python, as well as experience with frameworks and tools such as React, Node.js, Express, Tailwind and Bootstrap. I am also familiar with version control systems such as Git and have used various design tools such as Adobe Photoshop and Figma.

Initially, my focus was on graphic design, I had internships and worked at several companies as a graphic designer. This background has given me a new perspective that I now apply to front-end web development, creating visually appealing and intuitive user interfaces.

I am now fully dedicated to advancing my career as a specialist front-end web developer. I am passionate about leveraging cutting-edge technologies and best practices to build responsive, accessible, and engaging web applications. I am excited by the opportunity to contribute to innovative projects and collaborate with dynamic teams to push the boundaries of what is possible in web development.

Experience

Freelance

Graphic Designer

March 2020 - Present (4 years 5 months)

Dicoding Indonesia

Participant

February 2024 - June 2024 (5 months)

Bandung, West Java, Indonesia

Studi Independen Bersertifikat Pengembang Front-End Web dan Back-End ini diadakan untuk menghasilkan talenta berstandar tinggi yang sesuai dengan standar Industri di bidang pengembangan Front-End Web dan Back-End. Proses pembelajaran yang dilakukan adalah online learning, dimana peserta harus mengimplementasikan materi yang diperolehnya secara langsung melalui project dan tugas-tugas yang harus diselesaikan untuk menyelesaikan setiap materinya.

Materi diberikan secara asynchronous (online melalui modul belajar di Dicoding Academy) dan akan di-review setiap interval waktu tertentu oleh mentor. Selain project dan tugas, pemberian materi juga akan dilengkapi dengan kuis dan atau ujian pilihan ganda untuk memastikan pemahaman peserta.

Selain hard skill di bidang pengembangan Front-End Web dan Back-End, soft skill juga menjadi target kompetensi peserta studi independen yaitu untuk persiapan karir sebagai developer, termasuk namun tidak terbatas pada Personal Productivity, Growth Mindset and Personal Development, Flexing Under Pressure, Communication and Networking, Business Presentation, Personal Branding, dan Interview Preparation.

LearningX

Participant

August 2023 - December 2023 (5 months)

South Jakarta, Jakarta, Indonesia

Essential Programming Course merupakan pembelajaran berbasis praktik pembuatan website, mempelajari keseluruhan proses pembuatan website mulai dari front-end sampai back-end. Selama pembelajaran, setiap peserta akan mengikuti kelas dalam bentuk asynchronous dengan menyaksikan video pembelajaran dan bentuk synchronous dengan mengikuti online meeting dimana peserta dapat berkonsultasi dengan expert terkait materi yang

dipelajarinya. Pada akhir pembelajaran, setiap peserta akan memperoleh sertifikat penyelesaian
